DETAILED ACTION

Request for Continued Examination (RCE)

1. A request for continued examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/22/05 has been entered. New claims 23-28 have been added. Therefore, claims 1-14 and 21-28 are currently pending and examined on the merits.

Those sections of Title 35, US code, not included in the instant action can be found in previous office actions.

Reasons for Allowance

2. Applicants claim a method for screening a sample of complex biological mixture using two size exclusion techniques (e.g., SEC columns) wherein the target/ligand complex that is selected in the first size-exclusion step is subsequently "dissociated" (e.g., varying pH, salt, etc.) before applying the second size-exclusion step. The prior art of record does not fairly teach or suggest such a method. The closest prior art (i.e., Jindal et al.) teaches the application of a first and a second size exclusion step without an intermediate "dissociation" step. The dissociation that occurs in the Jindal et al. reference takes place during the second size exclusion step, not prior to the application of the second SEC column. Similarly, a method further comprising including a known competitive ligand that binds to the target in the reaction mixture is also not

taught by the prior art of record. Therefore, claims 1-14 and 21-28 (renumbered 1-22) are allowed.
